Why QR Code Attendance System?

With the recent insecurity cases witnessed nationally, we decided to come up with a system that monitors our students daily life activities.
The system aims not only to be a drive for security strength but also to reduce the rate of absenteeism in schools.

Unlike using fingerprints to track attendance, we use QR code which is more effective with the current epidemic situation.
With the SMS alert feature, parents get notified when their children arrive and leave school instantly.

To add on that, we aim at reducing paper usage in pursuit of keeping and preserving our environment.

## System Specification

1. User Login
2. Enroll a student into the system
3. View respective Student's details
4. Mark attendance through scanning QR Code
5. Export Attendance Report to an Excel Sheet
